“Our goal at ROBYG is to build homes and suitable surroundings for our clients. We develop homes and housing developments for entire communities that are integrated with the surrounding investments. We aim to build for the benefit of our clients with consideration for the nature and communities which already exist.”

Oscar Kazanelson  
Chairman of the Supervisory Board

**CARE**  
The protection of natural resources and care for the environment are very important to us, hence we implement ecological solutions in all of our housing estates.

**SUPPORT**  
We support local communities and foundations, we provide support for the most deprived members of the communities. We cooperate with local businesses and take part in local cultural and sporting events.

**RESPONSIBILITY**  
We act responsibly, choosing to cooperate with trustworthy partners, caring for the environment, and managing the company in a responsible way.

1 ROBYG FOR PEOPLE

2 ROBYG FOR PLANET

3 ROBYG FOR SUSTAINABLE BUSINESS

# The biggest ESG successes in 2024

Development of a consolidated sustainability report in cooperation with TAG, in accordance with the European Sustainability Reporting Standards (ESRS)

Voluntary assurance of the sustainability report by an external auditor

New methodology for calculating CO<sub>2</sub>e emission intensity and launch of Scope 3 reporting

Development of a consistent customer satisfaction survey methodology and extension of the questionnaire to include ESG-related questions

Adoption and implementation of the ESG Strategy for 2024–2028

Launch of preparations for the construction of rental investments in line with the EU Taxonomy

88% of multi-family residential buildings constructed in 2024 have a primary energy demand (Ep) 10% lower than required\*

Implementation of the Training Policy

\* An Ep indicator (primary energy demand of the building) 10% lower than the required level (65 kWh/m<sup>2</sup>/year) means compliance with the EU Taxonomy requirement for “construction of new buildings”, confirmed by energy performance certificates. A low Ep value translates into lower operating costs and reduced environmental impact.
